

Applications Engineering Request For Information (Valves)
Port Size?
Description of machine function/problem/application? (Include all detail – attach separate sheet as necessary)
Valve function required? (i.e. 2/3/4 way – open, closed, pressure center, N.O., N.C., selector, diverter).
Solenoid, mechanical, or air pilot operation? External pilot?
Media type?
Operating pressure(s)? (i.e. maximum & minimum)
Peak flow/Cv requirement? (Information is available for calculating these values upon request)
Voltage or special electrical requirements?
Response time or cycle rate requirements?
Special requirements or certifications? (i.e. UL, CSA, CCC, CE, medical or food service, etc.)
Body ported, base mount, manifold type?
Operating environment including temperature, contaminants, etc?
Condition or quality of the compressed air supply or other media characteristics? (i.e. temperature, contaminants, viscosity, etc.)
Description of the valve circuit or a schematic:
